

Your Project. Advanced.

Entech is an independent international mining consultant specialising in Mining Engineering, Geology and Geotechnical Services. Whether it is a five minute phone call, or a full mining feasibility study, Entech has the skilled personnel and capability to move your project forward.

A wealth of geological experience

The Entech Geology team is focussed on building client relationships based on collaboration. Our extensive operational experience is a core strength, regularly acknowledged by our clients, and ensures we have the depth of knowledge to provide practical, effective and technically strong solutions.

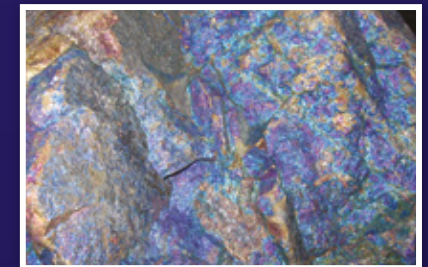

One area we have been particularly active in is the delivery of fit-for-purpose Mineral Resource estimates that dovetail into mining studies. We work closely with Entech's Mining and Geotechnical Engineers to ensure an Entech Mineral Resource enables our clients to de-risk the mining and financial decisions required to take a deposit into production and generate cash flow.

Our values

- **We Are Loyal.** With a strong focus on long term collaborative relationships with all our clients.
- **We Follow up.** An Entech Mineral Resource does not finish at the final invoice. We seek feedback and our door is always open.
- **We Understand Risk.** Assisting clients to successfully transition from open pit to underground mining.
- **We Are Current.** Working with global mining companies, mid-tier producers and junior explorers.

Our Geological Services

- JORC and CIM (NI43-101) Mineral Resource Estimations
- Project Due Diligence
- Independent Geological Reports
- Resource Review
- Co-Piloting and Skills Training
- Grade Control and Reconciliation Troubleshooting
- Database Management and Quality Reviews

Our Geology Team.

Jill Irvin

BSc Geology GradCert Geostatistics MAIG AWASM

- Operations and Consulting over 20 years.
- JORC and CIM Resource Estimations. M&A Due Diligence.
- Gold, Silver, Nickel, Zinc, Lead, Copper, Manganese in Australia, Africa, China, North America.

Meet the team. Pictured left-to-right: Andrew Finch, Jillian Irvin, Luke Barbetti, Jani Kalla, Ruth Jupp, Alan Miller

Luke Barbetti

BAppSc Geology MAIG MAusIMM

- Operations over 17 years. Recently Senior Geologist of Northern Star's Kundana Gold Mine.
- JORC Resource Estimations. Resource Audits. Grade Control and Reconciliation Troubleshooting. Drill Planning. Mentoring and Skills Training.
- Gold in Australia.

e: luke.barbetti@entechmining.com

Ruth Jupp

BSc Geology MAIG

- Operations and Consulting over 20 years.
- Geological Modelling, Resource Reviews, Database Management and Quality Reviews, Mentoring and Skills Training.
- Gold, Nickel, Zinc, Lead, Copper in Australia, Africa, North America.

e: ruth.jupp@entechmining.com

Alan Miller

BSc (Hons) Geology MAusIMM(CP)

- Operations and Consulting over 28 years.
- JORC and CIM Resource Estimations. M&A Due Diligence and Independent Geological Reports.
- Resource Audits, Mentoring and Skills Training.
- Gold, Nickel, Copper, Magnetite, Iron Ore in Australia, Africa, China, Macedonia and South America.
